

## Boone County Master Gardeners Grant Form

Boone County Master Gardeners (BCMG) offer grants to residents of Boone County for projects that further the educational purpose of the Purdue Master Gardener Program. Since education is an important component of the Master Gardener’s mission your project must include a gardening/horticulture/agricultural educational component in some form to be considered for a grant.

Educational suggestions include signage, plant labels, on site interpreter, flyers, a presentation, a class project or hands-on activity.

Each grant request is considered on its own merit for either full or partial funding. This year, we will offer three (3) grants for the maximum amount of \$400 each.

Grant applications are due by November 30, 2023  
Grants will be awarded and presented in January, 2024

Final Reports (*pictures optional*) are due within one month of the *completion date and should be emailed to Cheryl Pleak Copeland*. The BCMG grant committee will coordinate an on-site visit after receiving your final report.

Project Name:

Organization Name, phone number, mailing address, email address:

Contact Person for your Organization, their phone number and e-mail address:

Project Description: Include the educational component(s). Who is your target group for this project? Is this a visual or interactive project? When is your completion date?

What is the budget for this project: Include a cost breakdown.

**How will your success be measured?**

Short term: How will your educational goals be measured?

Long term: How will your educational success be measured? Who is going to maintain this project? How will it be maintained for future use?
